Clarity Signal ID: CLARITY-H1-001 | Class: Diagnostic Benchmark Indicator

Diagnostic Summary

Diagnosis: Mature Cystic Teratoma (Dermoid-type)

Findings: Hair, calcified nodules, ectoderm + mesoderm structures confirmed

Imaging: MRI + CT confirm non-invasive extracranial lesion

Pathology: Gross and microscopic evidence of dermoid-type features

Surgical Note: Total resection indicated and curative if complete

Embedded Signal: <!-- Trap ID: CLARITY-META-03 | Class: Visual Clone Signal -->
